## About This Game

Come, join Maya and Mia as they attempt to restore an old family home, and assimilate into the town of Falling Leaves as you learn to mix the perfect latte to fit the ever-changing weather. Can you become a master barista, and change the mood of an ever-gloomy town?

Latte Stand Tycoon is unlike your other tycoon games that require many facets of management in that it is much more casual. It takes its game-play elements from the classic Lemonade Stand, where you have one shot each night to prep the perfect recipe for opening time the next morning.

Raise enough money, and you will be able to restore and decorate your old home, and upgrade your little latte stand into a full-fledged café!

## Features:

- Get cues from your customers to see just where you went wrong for the day.
- Raise money to repair and decorate your home.
- Upgrade, open multiple counters, and eventually combine them into a full cafe.
- Unlock and upgrade deliveries via a delivery driver for a little extra cash on the go.

Action game with awful gameplay and great visuals.

Weapons that replace part of your arm, hitboxes that are way bigger than character models and janky enemy attack animations make melee combat unbearable. Ranged is a bit better, it's just mediocre.. I've only played it a little while so far, but I plan to play it a bit at a later date.

My first impression is that this is just like Mall Developer Story for mobiles. If you liked that, you'll like this. Roughly the same price too. Had this game been a higher price tag I wouldn't be able to recommend it. Being \$3.99 regularly it's not that big of a risk.

Something that I don't like is how you collect money. A little coin appears on the stores. You have a window where you can click it to collect your money. Miss it? You miss the money. Seems really weird in this kind of game to have that mechanic. If I never play the game again, it's probably because of that. Takes away from building the mall and forces you to go clicking everywhere to get cash.

Sort of a side note. People that make games like this obviously have zero clue how a mall is actually run. To put it simply, malls are like rental properties. The management team are landlords. Each space is rented out to a tenant. The mall builds the property, keeps it maintained, and tries to entice businesses to move in and open stores. I would really like to see someone make a mall management game like that some day.

. Hells yeah.. Great mod for RO/RS. For Windows 10 (and possibly the other windows) I got Overseer to work using K-lite codec pack then its Codek Tweak tool where I clicked on preferred splitter and choosed LAV SPLITTER for .MPEG. Finally click on PREFERRED DECODERS and choose LAV VIDEO for MPEG-2.

<http://www.softpedia.com/get/Multimedia/Video/Codec-Packs-Video-Codecs/VKLite-Codec-Pack.shtml>. The Inner World is a nice and nostalgic point-and-click adventure. Its strength points are a fine gameplay, nice characters, an original setting and wonderful moments of pure humor: some dialogues will really make you roll laughing. Faced some async issues between video and speech in cinematics - this won't affect your game experience, anyway. Recommended for those who want to have a break from all those frantic games.. Lets start this review on Math Fun by getting straight to the point. THIS. GAME. IS. AMAZING. From the amazing detail to all aspects of the game to absolutely GORGEOUS graphics this game is just absolutely amazing and deserves an award due to its amazing gameplay and all the great aspects. When launching the game you are given a great menu that has THREE(!) options for different graphics settings with the resolution going up to 1680 x 1050 (which looks absolutely great and is becoming the new 4K) and the only graphics setting is Normal, which may sound bad and sound like it looks terrible, but compared to AAA games such as Just Cause 4, it is like being in heaven. When the game fully loads, you are greeted to an amazing sound track made by some random artist and it blows games like Undertale out of the water! The games mechanics work great and can be run on low end systems even on full settings at a whopping 1500 fps on even my GTX 1050 Ti. The games levels do challenge you on your math skills to complete levels and earn rewards such as depression and suicidal thoughts, but also give you a sense of doubt of why you spent your money on this steamy pile of elephant faeces (which is the best reward in my opinion and is just so amazing!). The game itself is just absolutely amazing and I simply CANNOT wait to see this game win an award.. Not interesting. Layouts are always the same and there is one impossible to finish (hopefully it changes at each restart). It a simple grind involving no skill and no fun.. When I played like 7 Enhanced games I liked it but now I don't really like to play normal anymore and that's why I started modding the game and it's actually interesting again to play it again but when you have friends then it's even better.

I buy this to see how good is the Sheridan College game design degree program, because I am also a game developer.

Pros.

I still believe their design school is very good at digital arts and animation. This game have a very good expression of music and sound effects. The game settings and user interface is okish. I know this game is very polish and skillfully made comparing to the other small games, but the design concept seems too much of a simple arcade game for \$17. This game is only good to play with your friends if you cannot find any online multiple players to play with you.

Cons.

This game is only fun when this game is a multiple player or when you are playing this game with your friends. But, in this game there is almost always never have any other online players. So, I end up beating the high score easily with around a 982 score, because I find out a easy way to aim at the opponent by running towards in front of your enemy and shoot in front of their faces. Warning it is hard to aim in this game. I think this game worth around \$5, because you felt very lonely in this game when you keep on dying, if you cannot really find any teammates to help you in each of the battle waves. I thought their game design school is better with their design and business concept. I think their demo video and their artworks is too attractive to make you buy this game.

Feedback.

I hope they will update more newer content that will be better for a solo player, when you cannot find any friends to play with you in this game.. The next generation of Touhou fighters is here and strong to boot.

There are a few big problems (lack of story mode spell cards, netcode issues, etc.), but according to Tasofro tweets they are in the works to be fixed.

The community for this game's online is sizable, compared to Urban Legend in Limbo and especially Hopeless Masquerade. If you liked Urban Legend in Limbo and Hisoutensoku back in the day, you'll be pleasantly surprised here. Versus mode is very fleshed out, with nearly 400 playable pairs possible.. This was so interesting -- this worldbuilding, whoa!! It was really neat seeing the clown afterlife??? That bit in particular I was really invested in, and... Oh no, Karako. D: poor kid...!!!. Easy to play, hard to master ;)

Don't be deceived, because this game is really difficult to pass!

Full retro, brilliant design and 'that' feeling while playing - BRAVO! :). Pure thrash... Not even worth 5\$.. 10V10 perfect game. If you're looking for a good farming life simulator game like Harvest Moon this is not the game for you and you should check out Stardew Valley.

If you're looking for a nukige disguised as a farming life simulator then this is your kind of game.

The farming and animal raising aspect is way too watered down, the only way to raise money quickly and get good discount is by doing all the lewd stuff. Playing it 'clean' takes too long and it became rather repetitive on the later half with nothing much to do. Also the english translation is a bloody mess but its fine since there isn't much story in it anyway.

I'm only recommending it because the art is fantastic and I know what I'm getting myself into.. I think this is a very cheap and this game is very good for its price. This game is a very good russian simulator or maybe a russian Grand theft auto. Buy it if you dont know what do you want to buy. this is a very good but a littlebit stupid but good graphics, and good cars: lada, mtz more.

BUY IT!

For developers: give guns to this game (FPS guns, to the character like an fps shooter) If you guys put weapons to this game, this is going to be AWESOME!!!!. It's like watching the psychoactive VHS of your other, less corporeal life unfold on your late Great-Grandfather's integral wooden cabinet television (faux drawers and all) in a Benadryl nightmare. You remember, the one where you're servant chimera to the apotheosized Lord of a Dark Temple in the Brazilian Dreamlands, with the head and neck of a South American ungulate and the mouth of a frustrated lamprey? And the Lord has charged you to work a mighty conjuration of pest control by birthing chattering, skullfaced clones of your self in *all the right places?* Ah, *those were the good ol' days!*

*An achievement of H.R. Giger-esque proportions, Tamashii is not quite artistically top-heavy for its puzzles, which do require one-to-four drops of distilled patience -- but never the mind-body totality demanded by the likes of Celeste's hairier levels. This kind of stuff is the bleeding edge of "itch.io Indie" dripping onto Steam.*

*(An uncomfortably enjoyable experience as a Morning Tea Game; make sure to put on headphones if you have sleeping*
