SpyHunter 4573531 Portable

A: I know this question has an accepted answer, but I wanted to add in that I don't think this works from within a browser, and instead you have to download the exe, to be able to scan your entire computer. I downloaded the exe and followed the steps and it worked just fine. Hope that helps :) Q:

How to set execution time limit for a job in CBM To run a job for a long time (above than 5 hours) I have made it a cronjob. But the problem is that it does not work. Why? I have set it manually, it can run 4.5 hours (5 hours is the default). If the job takes more than 5 hours then it should wait for 5 hours and then run again. A: According to schedule's description, it seems the default is 5 hours. If you want to set another limit, please try to remove the ExecuteScheduleAtTimeInFuture from there.

[Update] In order to guarantee your jdk will not be used, please add this under the job. it can solve your problem. command = java.exe -cp cbmdb.jar;cbminf.jar;lib/commons-codec-1.4.jar;lib/common s-collections-3.2.jar;lib/commons-digester-1.8.jar;lib/commons-el-1.0.jar;lib/commons-fileupload-1.2.2.jar;lib/commons-io-2.1.jar;lib/commons-lang3-3.1.jar;lib/commons-logging-1.1.3.jar;lib/commons-ne t-3.0.jar;lib/compiler-2.1.1.jar;lib/jena-fila-2.4.0.jar;lib/jena-2.4.0.jar;lib/jena-parser-2.4.0.jar;lib/jp2-0.7.jar;lib/libgson-2.2.jar;lib/json-simple-1.1.1.jar;lib/luc 1cdb36666d
